TD: deceased Indian has, according to them, a long journey to take toward the west, antil he comes to a deep rushing river, which separates him from the happy hunting grounds. The two shores of this river are connected by a long pine trunk, stripped of bark and polished, which must be used as a

His sky is always clear, a cool breeze is perpetually blowing for him, and he passes his time in sailing, hunting, dancing, and boundless felicity. The had man, when he steps upon the bridge, sees the two overhanging shores totter, he attempts to esenpe, and falls into the abyes below, where the water is rushing with the sound of thunder over rocks; where the nir is poisoned by the exhalations from dead fish and other animal hodies, and the water whirling round and round, brings him always back to the same point; where all the trees are withered; where in swarms with lisards, snakes and toads; where the dead are hungry and have nothing to eat; where the living lead a dis-

"Now it there is a single one here who desires to see Satan and his kingdom prosper, he will rise and hold on his hand." Harvey, with some difficulty got to an erec

The Reading Gazette says that sometime ago one of its subscribers discontinued because he was taking too many papers. He thought he would try to do week, however, the "discontinued" sub scriber came and ordered the paper again,fle did not know before, he said, how inter esting the local news was. Since he had stopped it, he was entirely ignorant of all that was going on in the city and county, and he missed it more than he would have missed all his other papers put together. He was satisfied now he could not do without a county paper, and he would never be without one again This was a very sensible conclusion. The home news that the county papers collects and publish, is of far more interest and importance to the citizens of the county, than all the contents of the New York or Philadelphia papers; and it is a queer illustration of the propensity people have of under-valuing . everything at home, and seeking what they want abroad, that to many refuse to take the papers published in their own immediate neighborhood, while they will take three or four from the distant cities. If they could only be prevailed upon to take a county paper for a year or two, they would, like the subscriber whose case we have mentioned. discover that they couldn't do without it.

Ayer's Sarsaparilla

It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases to aford an effective antidote for the diseases Barsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-effizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found of the following complaints:

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the expel the foul humors which fester in the blood at that season of the year. By the time-ly expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous scree, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruptions, or sores; cleanse it when you find it is obor sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse is whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no nesting health. lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown. Sarsaparilla has, and deserves much, the

reputation, of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug slone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, coutsin but little of the virtue of Samujarilla, or any thing else.

During late years the public have been mis-

led by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter and painful disappointment has followed the use of the various extracts of Sursaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Saraparilla, and intend to supply such a samedy as shall rescue the name from the load of chloquy which seeks upon it. And we think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intended to cure. In order to scene their complete eradication from the system, the remedy should

Declaration of Independence. JULY 4, 1776.

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal stations to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they

them to the separation. We hold these truths to be self evident, that all men are created equal; that they are endowed by their Creator with certain unationable rights; that | among these, are life, liberty, and the ishing our most valuable laws, and althese rights, governments are instituted our governments : among men, deriving their just powers; from the consent of the governed; that, and declaring themselves invested with whenever any form of government becomes destructive of these ends, it is the right of the people to after or to abolish it, and to institute a new government, laying its foundation on such

principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all plete the works of death, desolation, experience bath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future scenrity. We copy the following article from the States, the organ of Judge Douglas at Washinglon:

The Philadelphia Press of Saturday, in noticing the recent letter of Judge Douglas, can party there, remarks " He plants himself upon the recognized and

accepted principles of that party, and although he abstrined from saying the ward, the whole tenor of his communication is to the effect that when the doctrines of a great political party are rejected and betrayed, it is tille to plead in its behalf the skeleton of a mere organization." Mr. Forney would thus convey the impression that Judge Douglas has absolved himself

from his allegiance to the Democratic party, and is in rebellion to the Charleston Conven tion. As far as we are advised, Judge Douglas has never for a moment entertained a notion manifesting such a purpose. No intention of the kind is expressed or

implied in anything that he has said or written. He has merely stated that in case a platform is not adopted at Charleston in harnony with his own opinions and views, he would not be disposed to accept the Presidential candidacy. It has been the invariable rule, in Democratic national conventions, to first make the nomination and afterwards prepare the manifesto of the party. This manifesto is submitted to the nominee for his neceptance. If he disapproves of it, as a matter of course he would decline the honor conferred upon him. But would it not be ridiculous to suppose that because he could not conscientionaly support all the conditions therein contained, he would array himself against it, as a member of the party with easily solved. Ayer's Sarsaparilla

A compound remedy, in which we have la-

It is a concentrated extract of Para Sanaparilla, so combined with other of Para Sarauparilla, so combined with other substances of still greater alterative power on to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been moved by expercompound will do it has been proven by experinusit on many of the worst cases to Le found

of the following complaints: -Senorula and Senorulus Complaints, SCROPULA AND SCROPULIUS COMPLAINTS, ERPPTIONS AND ERUPTIVE DISEASES, ULCERS, PINCLES, BLOUCHTS, TUMORS, SALE RICOM, SCALO HEAD, SYPHILIS AND SUPPLIES AP-FECTIONS, MERCHAEL DISEASE, DROPAY, NEU-RALDIN OR THE DOLLOGREEN, DEBILITY, DYS-PUPSIA AND INDIGESTION, EMPSIPHEAS, Rosn on Sr. Anthony's Faur, and indeed the whole class of complaints arising from IMPURITY OF THE BLOOM

This compound will be found a great pro-This compound will be found a great promoter of health, when taken in the spring, to expel the foul hamors which fester in the blood at that sea-on of the year. By the timely expulsion of them many rankling disorders are nipped in the bad. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcorous series, through which the austron will strive to seres, through which the system will strive to rid itself of corresptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pinsples, eruptions, or sores; cleanse it when you find it is obstructed and shinggish in the veins; cleanse is whenever it is foul, and your feelings will tell you when. you when. Even where no particular disorder is felt, people enjoy better health, and live is left, people campy better nearin, and nive longer, for cleaning the blood. Keep the blood healthy, and all is woll; but with this pabulum of life disordered, there can be no lasting health. Somer or later something

must go wrong, and the great machinery of life is disordered or overthrown. Sarsaparilla has, and deserves much, the reputation, of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it but recent for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Savaparilla,

or any thing else. or any thing else.

During late years the public have been mialed by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been franch upon the sick, for they not only contain little, if any, Samaga-rilla, but often no curative properties blates-Hence, bitter and painful disappointment has followed the use of the various extracts of Sursaparilla which flood the market, until the name itself is justly despised, and has become eynonymous with imposition and cheat. Still we call this compound Sarsopmilla, and intend to supply such a memory as shall record the name from the load of oldony which goests upon it. And we think we have ground believing it has virtues which are presistible by the adimmy run of the diseases it is intended to care. In order to scene their complete eradication from the system, the remady should
